Caprice
Foster wasserstrich

Kiezelweg 458-460 • B-3620 Lanaken (Kesselt) • +32 12 44 02 44 • info@nelissen.be • www.nelissen.be

This brick is manufactured from red coloured high quality river clay originating from the Netherlands.

ASPECT AND STRUCTURE

The (non-perforated) facing brick is unsanded. The surface may have a frog (a slanted oblong groove). On 1 stretch/straight side and 1 front/short side, this facing brick has a green engobe. Recommended method: Alternate between the engobed and non-engobed sides. The final aesthetic result is the choice and thus the final responsibility of the customer and/or processor. The structure looks smooth.

COLOUR

A mainly green hue. The colours shown are a near reflection of reality.

PROCESSING

Consult our **processing directions** to ensure correct and successful execution of the facade masonry.
Specific directions are available for the N70 format.

AVAILABLE SIZES

Other sizes are available on request starting from 2.000 m². Size variations may occur when blending brick types of different clay colours. Depending on the series the size may differ.

	WV 50
Available sizes	✓
Dimensions in mm	±210x100x50
Pieces per m² traditional masonry (±12 mm)	±75
Pieces per m² thin-bed mortar masonry (±6 mm)	±87
Pieces per m² glued masonry (±4 mm)	±91
